

Heat Pump with Puron® Refrigerant

MODEL 215B

LEGACY™
LINE

As an ENERGY STAR® Partner, Bryant Heating & Cooling Systems has determined that this product meets the ENERGY STAR® guidelines for energy efficiency.

A Legacy of Trusted Comfort

America's Trusted Comfort Source

Bryant® has a history of doing whatever it takes to deliver trusted quality, comfort and value to millions of homeowners nationwide. Today, with higher consumer awareness of environmental issues and rising energy costs, Bryant proudly offers an answer that eases those concerns while delivering economical, reliable comfort - the Model 215B Heat Pump with Puron® refrigerant.

The Bryant Model 215B can save on monthly energy costs with up to 15 SEER cooling and up to 8.5 HSPF heating efficiency. It helps preserve the integrity of the Earth's ozone layer by using Puron® refrigerant. And, with its Microtube™ Technology refrigeration system, the quiet, reliable scroll compressor, and our tough, DuraGuard™ protection package, it provides responsive heating and cooling you can count on, year after year.

Enjoy the Savings with Tax Credit Eligibility

The Bryant Model 215B delivers the high energy efficiency needed to qualify for U.S. Government tax credit dollars. Tax credits are like money in the bank because they are subtracted directly from the taxes you owe. In addition, many local utility companies and municipalities offer money-back incentives to

purchase high efficiency products. Ask your dealer for details on how much you can save with this model. When you replace an older 8 - 10 SEER heat pump with the Model 215B, you'll continue to save every time you pay your utility bill for many years to come.

Warranty

To the original owner, the Bryant Model 215B heat pump is covered by a 10-year parts limited warranty upon timely registration of your new equipment.* Ask your Bryant dealer about optional extended warranties, which may include labor.

*Warranty period is 5 years if not registered within 90 days. Jurisdictions where warranty restrictions are not allowed will automatically receive a 10-year parts warranty. See warranty certificate at Bryant.com for complete details.

Performance

Proper sizing and installation of equipment is critical to achieve optimal performance. Split system air conditioners and heat pumps must be matched with appropriate coil components to meet ENERGY STAR criteria. Ask your contractor for details or visit www.energystar.gov.

Perfect Your Comfort with Perfect Humidity®

The Model 215B is your trusted source for comfort all year long. For enhanced control over temperature AND humidity, add a variable speed gas furnace or electric fan coil and our Thermidistat™ Control. This system will give you full, seven-day-a-week programmability and our comfort-enhancing Perfect Humidity® function. Perfect Humidity elevates your comfort by providing up to 30 times the humidity control of standard heat pump systems.

The Thermidistat™ Control is much more than just a thermostat. It is your single source of precision temperature, humidity and indoor air quality control.

Step Up to HYBRID HEAT®

As energy costs continue to rise unpredictably, Bryant offers a solution you can get comfortable with - HYBRID HEAT®. By combining the Model 215B heat pump with a variable speed furnace and matching control, a HYBRID HEAT system automatically selects the most economical heating source for your heating needs. This system gives you the ultimate in flexibility to maintain your comfort as weather conditions and energy prices change.

Environmentally Sound Comfort, Future Savings

With the Model 215B, you join the growing ranks of homeowners who choose environmentally sound Puron® refrigerant. It's an important consideration because Freon®-22*, the refrigerant most commonly used in heat pumps, is gradually being phased out of existence due to concern over the Earth's ozone layer. In fact, manufacturers such as Bryant will no longer create Freon-22 products as of January, 2010. While these products may continue to be available as inventories last, costs to service heat pumps using Freon-22 may rise as supplies dwindle. The Model 215B also offers a proven record of superior reliability that has been established since the first Puron product was introduced in 1996. And, because Bryant is the only manufacturer to put every single heat pump we make through a thorough, 5-step 100% reliability run test process, you can be confident the Model 215B is built to perform.

*The registered owner of Freon is E.I. DuPont de Nemour & Co.

Home Comfort Components

PURON® REFRIGERANT

Bryant's environmentally sound refrigerant keeps you comfortable season after season without depleting the Earth's ozone layer.

- 1 ENVIRONMENTALLY SOUND**
Our scroll compressor is designed for use with Puron® refrigerant to provide quiet comfort and years of environmentally sound, energy-efficient performance.
- 2 RELIABLE PERFORMANCE**
Bryant's Microtube™ Technology refrigeration system with copper tube/aluminum fin coil maximizes transfer of heat outside your home to ensure energy efficiency. Coil materials and design minimize chances for rust and corrosion for lasting performance.
- 3 LASTING COMFORT**
A filter drier protects the unit's most important single component: the compressor.
- 4 BUILT TO LAST**
Bryant's DuraGuard™ protection package ensures lasting durability and good looks through years of exposure to weather, sports and lawn equipment and more. Three key elements to this package include: galvanized steel cabinet, baked on powder paint and wire coil guard.
